About the Project

The Florida Department of Transportation (FDOT) is rehabilitating Interstate 275 from 54th Avenue South to 26th Avenue South in Pinellas County, Florida. This project also will resurface 54th Avenue South from 31st Street South to 41st Street; and 26th Avenue South from 31st Street South to 34th Street South. Concrete rehabilitation includes all interchange ramps within the project limits. Mast arm signals will be installed at the 54th Avenue South exit ramp and at the 54th Avenue South/34th Street (U.S. 19) intersection.

Improvement Highlights

- Rehabilitate the existing concrete as described above.
- Upgrade existing guardrail to meet current standards.
- Minor drainage improvements.
- Upgrade signing and pavement markings.

Traffic Flow

Traffic will be maintained during the day. Ramps will be closed a short number of days to reconstruct or rehabilitate. Detours will be posted during ramp closure periods.

Night Work

The majority of work associated with this project will be done at night in order to keep lanes open during the high use periods of the day. Lane closures will occur between 7:30 p.m. and 7:00 a.m. as needed. While we will try to minimize all disturbances, area residents and businesses can expect some noise and lighted work areas.
